

Profile

Technovators is a Software Development company that has over the last five years expanded into Graphic Design, Web Development and Corporate Branding.

We are focused on launching the SME (Small to Medium Enterprises) sector into the world of Information Technology. We develop secure, modern and affordable software solutions tailored to your business needs.

Services

Software Systems

We have developed management systems across multiple industries. We have adopted the agile modelling technique. This involves constantly working with the client through each iteration of the development process. This ensures that the solution presented at the end of the project is fully approved by the client and is within the scope of the requirements.

We have developed Payroll Systems, E-ticketing Systems, Inventory Management Systems, Fleet Management Systems to mention a few. Our systems are developed from the ground up and supported inhouse by ourselves.

Graphic Design

We design posters, banners, Flyers, Invitations and plenty more advertising/marketing materials. We have associates in the offset printing industry and can facilitate competitive rates for you as our client.

Web Development

We develop responsive websites. Those are websites that render correctly on mobile, tablet and PC platforms. We have vibrant designs and features that will keep your site visitors engaged throughout their browsing experience.

Corporate Branding

We offer comprehensive branding packages for companies. From logo development to corporate stationery, we have designs that will have you at the top of your industry.

Products

We are suppliers of Laptops, Desktops, Peripheral Devices (Printers, Scanners, Keyboards, Mice Etc.). We also supply Microsoft Windows, Antivirus Software and Microsoft Office Suites.
